

**L. M. Davis** has been writing fantasy fiction since the third grade. The first short story that she wrote was about a vampire family that returned to their ancient home on one night each year—Halloween—to feast on its inhabitants. Told in the first person, “The Vampires Return,” was the *harrowing* account of a young girl’s survival of one such Halloween. Since that first foray into fantasy writing, Davis has penned many fantasy stories about werewolves, mermaids, gods and goddesses, several of which have been published in various literary magazines, including *Saracen*.

Her Shifters Novel series is the coming-of-age story of Nate Pantera, a young man trying to find his place in multiple worlds. Nate and his twin sister Larissa have always known that they were different. They are, after all, shifters, were-panthers to be more precise, from a family of shifters. What Nate and Larissa don't realize is how truly different they are, but they are about to find out. Strange things begin to happen both at school and at home, and the twins begin to wonder what their parents have been keeping secret and why. Fans of *Children of Blood and Bone* will love this adventure series about the Pantera twins who discover that everything they thought they knew is only the beginning of the truth. The series has received great reviews, and the third installment, *Forgers*, will be published in 2021.

Dr. Davis has several degrees in English, including a Ph. D. from Emory University. She is a scholar of African American and Native American literatures and cultures and has published several non-fiction essays on these subjects.
